

NRF-SAIAB STUDENT SYMPOSIUM PRESENTS:

THE RIPPLE EFFECT: IMPACTFUL SCIENCE

Scientific research does more than generate knowledge—it shapes how we understand, protect, and sustain our world. Much like ripples spreading across water, the questions we ask and the discoveries we make extend far beyond where the research is conducted, influencing ecosystems, communities, and policy. This student symposium highlights aquatic research that demonstrates tangible impact, emphasizing not only the what but the why behind our work.
